I have 1.4 years of relevant experience as software developer skilled in ReactJS, TypeScript, NextJS, Redux, and GraphQL. My work includes developing responsive web apps, optimizing load times, and using TypeScript for error prevention. Crafting visually appealing UIs with Vanilla CSS and Tailwind CSS is a strong suit. Collaborative work with backend teams and continuous learning, including advanced React Hooks and GraphQL subscriptions courses, are among my strengths. I'm enthusiastic about contributing my adaptable skills to the SDE1 Frontend position, always dedicated to quality results.
